Subject Index—Volume 102

No. 1, February 25, pp. 1–66
No. 2, April 25, pp. 67–132
No. 3, June 25, pp. 132–202
No. 4, August 25, pp. 203–268
No. 5, October 25, pp. 269–328
No. 6, December 25, pp. 329–394

A

Abbott method, vs. antigen retrieval, in estrogen receptor immunodetection, 34
Adenocarcinoma, early-stage lung, micropapillary clusters in, prognosis and, 81
Adenocarcinoma in situ, cervical, failure to detect on Pap smears, 280
Adenoid cystic carcinoma, vs. pleomorphic adenoma, c-kit (CD117) immunolocalization in, 207
Adenoma
  microcystic, of pancreas, 288
  pleomorphic, vs. adenoid cystic carcinoma, c-kit (CD117) immunolocalization in, 207
Adrenal gland, endoscopic ultrasound-guided fine-needle aspiration biopsy of
  diagnostic utility of, 308
  lesion size and, 203 (editorial), 239
Anal squamous lesions, screening for, anorectal cytology in, 19
Aneusomy, in nipple cytology, 322
Anthracotic index, for sputum cytology, 348
Antigen retrieval, in estrogen receptor immunocytochemical analysis, 34
Asian screening population, atypical squamous cells of undetermined significance in, 74, 200 (letter)
Aspiration biopsy. *See* Fine-needle aspiration biopsy
Atypical squamous cells of undetermined significance
  in Asian screening population, 74, 200 (letter)
  in HPV-positive Pap smears, tetraploidy and, 192

B

Biopsy, aspiration. *See* Fine-needle aspiration biopsy
Bladder cancer, urine cytology specimens in, spectral information in, 186
Blinded review, of Pap smears, in litigation, 133 (editorial), 136
Body cavity fluid, psammoma bodies in, 87
Breast, fine-needle aspiration biopsy of
  adequacy evaluation of, 295
  atypical vs. suspicious findings on, 164
Breast cancer
  immunodetection of estrogen receptor in specimens from, antigen retrieval in, 34
  DNA image cytometry vs. fine-needle aspiration biopsy in, 380
  nipple cytology in, 233
  chromosomal aneusomy in, 322
  pleural effusion in, mammaglobin and CRxA-01 in, 368

C

Carnoy's-Pap smear, vs. antigen retrieval, in estrogen receptor immunodetection, 34
CD117, in adenoid cystic carcinoma vs. pleomorphic adenoma, 207
CDX-2, in colorectal cancer, 168
Cervical cancer
  adenocarcinoma in situ, failure to detect on Pap smears, 280
  glandular cell lesions, Pap smear in prediction, 210
Cervical cytology, 67. *See also* Papanicolaou smear; ThinPrep smears
  atypical squamous cells of undetermined significance in, in Asian screening population, 74, 200 (letter)
  DNA image cytometry in, 41, 373
  FocalPoint System for, 334
  liquid-based
    DNA methylation profiling in, 259
    HPV in
      Hybrid Capture 2 vs. in situ hybridization for, 11
      vs. p16, 100
    vs. conventional Pap smear, multisite direct-to-vial study of, 269, 362
  prescreening in, 329 (editorial), 331, 345
  rescreening in, 329 (editorial), 331
  severe cervical glandular cell lesions and severe cervical combined lesions in, 210, 218
Cervical squamous intraepithelial lesions
  DNA methylation profiling of, 259
  in pregnancy, 228
Ciliary tufts, detached, foregut duplication cyst fluid, 253
c-kit immunolocalization, in adenoid cystic carcinoma vs. pleomorphic adenoma, 207
Correspondence, 200
CRxA-01, in pleural effusion, 368
Cysts, foregut duplication, endoscopic ultrasound-guided fine-needle aspiration biopsy of, 253
Cytometry
  DNA image
    in cervical cytology, 41
    of progressive vs. regressive cervical epithelial cell abnormalities, 373
    vs. fine-needle aspiration biopsy, in breast disease, 380

Subject Index—Volume 102

    HPV in
      Hybrid Capture 2 vs. in situ hybridization for, 11
      vs. p16, 100
    vs. conventional Pap smear, multisite direct-to-vial study of, 269, 362
  prescreening in, 329 (editorial), 331, 345
  rescreening in, 329 (editorial), 331
  severe cervical glandular cell lesions and severe cervical combined lesions in, 210, 218
Cervical squamous intraepithelial lesions
  DNA methylation profiling of, 259
  in pregnancy, 228
Ciliary tufts, detached, foregut duplication cyst fluid, 253
c-kit immunolocalization, in adenoid cystic carcinoma vs. pleomorphic adenoma, 207
Correspondence, 200
CRxA-01, in pleural effusion, 368
Cysts, foregut duplication, endoscopic ultrasound-guided fine-needle aspiration biopsy of, 253
Cytometry
  DNA image
    in cervical cytology, 41
    of progressive vs. regressive cervical epithelial cell abnormalities, 373
    vs. fine-needle aspiration biopsy, in breast disease, 380

flow
in non-Hodgkin lymphoma, 55
in primary pancreatic lymphoma, 55
laser scanning, in urologic cytology, 115

D

Detached ciliary tufts, foregut duplication cyst fluid, 253
DNA flow cytometry
in non-Hodgkin lymphoma, 55
in primary pancreatic lymphoma, 55
DNA image cytometry
in cervical cytology, 41
of progressive vs. regressive cervical epithelial cell abnormalities, 373
vs. fine-needle aspiration biopsy, in breast disease, 380
DNA methylation, of sputum specimens, 348
DNA ploidy analysis, using laser scanning cytometry, in urologic cytology, 115
Duplication cysts, foregut, endoscopic ultrasound-guided fine-needle aspiration biopsy of, 253

E

Editorials, 133, 203, 329
Endoscopic ultrasound-guided fine-needle aspiration biopsy, 203 (editorial)
of adrenal gland, 239, 308
advantages and disadvantages of, 253
of foregut duplication cysts, 253
of gastrointestinal lesions, 157
lesion size and, 239
Epithelial brushings, ovarian surface, cytology of, 1
Estrogen receptors, immunocytochemical analysis of, antigen retrieval in, 34

F

Fine-needle aspiration biopsy
of breast
adequacy evaluation of, 295
atypical vs. suspicious findings on, 164
colorectal adenocarcinoma, CDX-2 expression, 168
endoscopic ultrasound-guided, 203 (editorial)
of adrenal gland, 239, 308
advantages and disadvantages of, 253
of foregut duplication cysts, 253
of gastrointestinal lesions, 157
lesion size and, 239
flow cytometry and, in non-Hodgkin lymphoma, 55
in grading of hepatocellular carcinoma, 247
of lung tumors, thyroid transcription factor-1 immunostaining in, 109
in microtrabecular hepatocellular carcinoma, 27
of mucinous pancreatic tumors, 92
of myoepithelial cell–rich lesions, 355
of primary pancreatic lymphoma, 55
of solitary thyroid nodules, 302
vs. DNA image cytometry, in breast disease, 380
Flow cytometry
in non-Hodgkin lymphoma, 55
in primary pancreatic lymphoma, 55
Fluorescence in situ hybridization (FISH)
detection of chromosomal aneusomy nipple fluid, 322
in detection of t(11;14) translocation, in mantle cell lymphoma, 124
FocalPoint System, 334
Foregut duplication cysts, endoscopic ultrasound-guided fine-needle aspiration biopsy of, 253

G

Gastrointestinal lesions, endoscopic ultrasound fine-needle aspiration biopsy of, 157

H

Hepatobiliary tract, endoscopic ultrasound-guided fine-needle aspiration biopsy of, 203 (editorial), 239
Hepatocellular carcinoma
grading of, fine-needle aspiration biopsy in, 247
microtrabecular, fine-needle aspiration biopsy in, 27
Human ovarian surface epithelium, cytology of, 1
Human papillomavirus
in ASCUS Pap smears, tetraploidy in, 192
in liquid-based cervical samples
Hybrid Capture 2 vs. in situ hybridization for, 11
vs. p16, 100
Hybrid Capture 2, vs. in situ hybridization, for detection of HPV in liquid-based cervical samples, 11

I

Imprint cytology, in lymphoma, 174
In situ hybridization, vs. Hybrid Capture 2, for detection of HPV in liquid-based cervical samples, 11

K

Ki-67 staining, of ThinPrep cell blocks, 142

L

Laser scanning cytometry, of urologic cytology specimens, 115
Liquid-based cervical cytology. *See also* Cervical cytology
DNA methylation profiling for, 259
HPV in
Hybrid Capture 2 vs. in situ hybridization for, 11
vs. p16, 100
vs. conventional Pap smear, multisite direct-to-vial study of, 269, 362
Litigation, blinded review of Pap smears in, 133 (editorial), 136
Lung cancer
early stage adenocarcinoma, micropapillary clusters in, prognosis and, 81
pleural effusion in, mammaglobin and CRxA-01 in, 368
sputum specimens in, anthracotic index and DNA methylation for, 348
Lung tumors, fine-needle aspiration biopsy of, thyroid transcription factor-1 immunostaining in, 109
Lymph nodes, endoscopic ultrasound-guided fine-needle aspiration biopsy of, 203 (editorial), 239

Lymphoma
cell proliferation in, morphometric analysis of, 174
mantle cell, t(11;14) translocation, FISH detection, 124
non-Hodgkin, fine-needle cytology/flow cytometry, 55
primary pancreatic, 315

M

Malpractice litigation, blinded review of Pap smears in, 133 (editorial), 136
Mammaglobin, in pleural effusion, 368
Mantle cell lymphoma, t(11;14) translocation in, FISH detection of, 124
Microcystic adenoma of pancreas, 288
Micropapillary clusters, in early-stage lung adenocarcinoma, prognosis and, 81
Microtrabecular hepatocellular carcinoma, fine-needle aspiration biopsy in, 27
Mucinous pancreatic tumors, fine-needle aspiration biopsy of, 92
Myoepithelial cell–rich lesions, cytology of, 355

N

Nipple cytology
chromosomal aneusomy in, 322
diagnostic value of, 233
Non-Hodgkin lymphoma. *See also* Lymphoma
cell proliferation in, morphometric analysis of, 174
fine-needle cytology and flow cytometry in, 55

O

Ovarian surface epithelial brushings, cytology of, 1
Ovarian tumors, peritoneal involvement in, pelvic washings for, 150

P

p16, in liquid-based Pap smears, 100
p16INK41 staining, of ThinPrep cell blocks, 142
Paget disease of breast, nipple cytology in, 233
Pancreas, endoscopic ultrasound-guided fine-needle aspiration biopsy of, 203 (editorial), 239
Pancreatic lymphoma, primary, 315
Pancreatic microcystic adenoma, 288
Pancreatic mucinous tumors, fine-needle aspiration biopsy of, 92
Papanicolaou smear. *See also* Cervical cytology
blinded review of, in litigation, 133 (editorial), 136
failure to detect adenocarcinoma in situ in, 280
FocalPoint System for, 334
HPV-positive ASCUS, tetraploidy in, 192
in prediction of glandular cell lesions, 210
vs. antigen retrieval, in estrogen receptor immunodetection, 34
vs. liquid-based cervical cytology, multisite direct-to-vial study of, 269, 362
Pelvic washings, for peritoneal involvement in ovarian tumors, 150
Pericardial fluid, psammoma bodies in, 87
Peritoneal fluid, psammoma bodies in, 87
Peritoneal involvement, ovarian tumors, pelvic washings, 150
pKi-67, in lymphoma, cell proliferation and, 174
Pleomorphic adenoma, vs. adenoid cystic carcinoma, c-kit (CD117) immunolocalization in, 207
Pleural fluid
CRxA-01 in, 368
mammaglobin in, 368
psammoma bodies in, 87
Ploidy analysis, using laser scanning cytometry, in urologic cytology, 115
Pregnancy, cervical squamous intraepithelial lesions, 228
Psammoma bodies, in serous cavity fluid, 87

Q

Quality assessment, cervical cytology, prescreening, 345

S

Screening, anal squamous lesions, anorectal cytology, 19
Serous cavity fluid, psammoma bodies in, 87
Solitary thyroid nodules, fine-needle aspiration biopsy, 302
Spectral information, in urine cytology, 186
Spleen, endoscopic ultrasound-guided fine-needle aspiration biopsy of, 203 (editorial), 239
Sputum specimens, anthracotic index and DNA methylation for, 348
Squamous lesions, anal, screening, anorectal cytology, 19
SurePath, 362

T

Tetraploidy, in HPV-positive ASCUS Pap smears, 192
ThinPrep smears. *See also* Cervical cytology
clinical trial data and early experience with, 340
p16INK41 and Ki-67 staining of, 142
unsatisfactory, reprocessing of, 67
Thyroid nodules, solitary, fine-needle aspiration biopsy of, 302
Thyroid transcription factor-1 immunostaining, of fine-needle aspiration specimens of lung tumors, 109
Touch imprint cytology, in lymphoma, 174

U

Ultrasound-guided fine-needle aspiration biopsy, 203 (editorial)
of adrenal gland, 239, 308
advantages and disadvantages of, 253
of foregut duplication cysts, 253
of gastrointestinal lesions, 157
lesion size and, 239
Urine cytology, spectral information in, 186
Urologic cytology specimens, laser scanning cytometry, 115
